The above figures are based on ABS figures for Estimated Resident Population

Council has 5 Planning Areas making up the City (see attached map). Population figures for these and various towns and villages are shown below and are subject to the following notes:

- Data comes from ABS (Australian Bureau of Statistics) census figures for 1996, 2001 and 2006 (place of enumeration, excluding overseas visitors)
- Council is using a new web based system to access this and other census data, a link to which is located on Council's website
- Many of the boundaries have changed to reflect locality boundaries (as adopted by Council and the Geographic Names Board). However, this will give a more stable comparison base for future years, so figures may differ from previously published figures. These figures may also be different to those for areas with similar names on the ABS website as those do not use the locality boundaries.
